Art Unit: 1711

1. Applicants' election of Group I, claims 13-19 in the response, filed August 8, 2003, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claim 16 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.
3. Claims 13-15 and 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Firstly, the term, "liquid", renders the claims indefinite, because the physical conditions at which the diol is in the liquid state have not been set forth.

Secondly, within line 2 of claim 13, the language, "... polyethercarbonate diol comprising a reaction of a ...", is imprecise, because the polyethercarbonate diol comprises a reaction product of the reactants.

Thirdly, within lines 3 and 4 of claim 13, the language, "... at least one member of structural units (b) and (c) ...", is confusing, because it is unclear if at least one of each of the units is required. If at least one of each of the units is not required, then the units should be specified in the alternative.
